Technical Skills

Languages: Dart, Python, JavaScript, TypeScript

Frameworks/Libraries: Flutter, Node.js, React.js, React Native, Expo, Express.js, NestJS, Fastify

Databases/Tools: PostgreSQL, TypeORM, Prisma, Firebase, MongoDB, NeonDB, Supabase

Experience

Fensory

April 2026 – Present

Full Stack Engineering Intern

Remote

- Built and shipped the Fensory mobile app end-to-end, using NestJS (Fastify) and PostgreSQL for the backend and Expo/React Native for the mobile application.
- Worked on the company's core backend, optimizing authentication flows, reducing loading times, and improving code quality and maintainability.
- Delivered 10+ features and enhancements to the main backend, contributing to product development and platform stability.

Sniphat

January 2024 – October 2024

Software Development Engineer Intern

Bangalore, India

- Optimized loading times of the application, significantly improving user experience and platform efficiency.
- Shipped features in a fast-paced team, focusing on performance optimization and product iteration.

Pixelotech

August 2022 – December 2022

Software Development Engineer Intern

Remote

- Modernized a legacy codebase through iterative refactoring.
- Collaborated with the project manager and team to hit sprint milestones on schedule.
- Integrated multiple third-party APIs for seamless data retrieval and improved app functionality.

The Bigger Stories

June 2022 – August 2022

iOS Intern

Remote

- Designed and developed responsive UI layouts for a seamless user experience across multiple devices.
- Complied with Apple App Store guidelines, leading to successful approval and deployment of the app.

Projects

UpNext | *TypeScript, Next.js, Node.js, Express.js, PostgreSQL, Prisma, WebSockets, EC2* | [GitHub](#)

- A real-time collaborative music queue. Hosts spin up a session, participants join via a code, and everyone can search for tracks or add YouTube/Spotify links before voting on what plays next. The queue re-orders by vote count in real time, and the host's browser plays audio for the room.

Electricity Billing System | *React.js, Express.js, PostgreSQL, Prisma, Gemini API, Razorpay, Web3.js* | [GitHub](#)

- Developed a full-stack electricity billing platform for campus-level usage management. Initially built with the MERN stack and later migrated to PostgreSQL with Prisma ORM. Integrated Google Gemini Vision API to extract meter readings from uploaded images and implemented payments via Razorpay and cryptocurrency options.

Encore Medlabs | *Flutter, Firebase, Cloud Functions*

- A cross-platform medical lab booking app with a companion vendor app, built with Flutter, Firebase Firestore, Mobile Auth, and Provider (MVC). Users schedule tests and view pricing; the vendor side lets the client track orders and manage discounts in real time.

Education

Birla Institute of Technology and Science, Pilani

2023 – 2027

Bachelor of Science in Computer Science

Pilani, Rajasthan
